

Mosquito Larvae

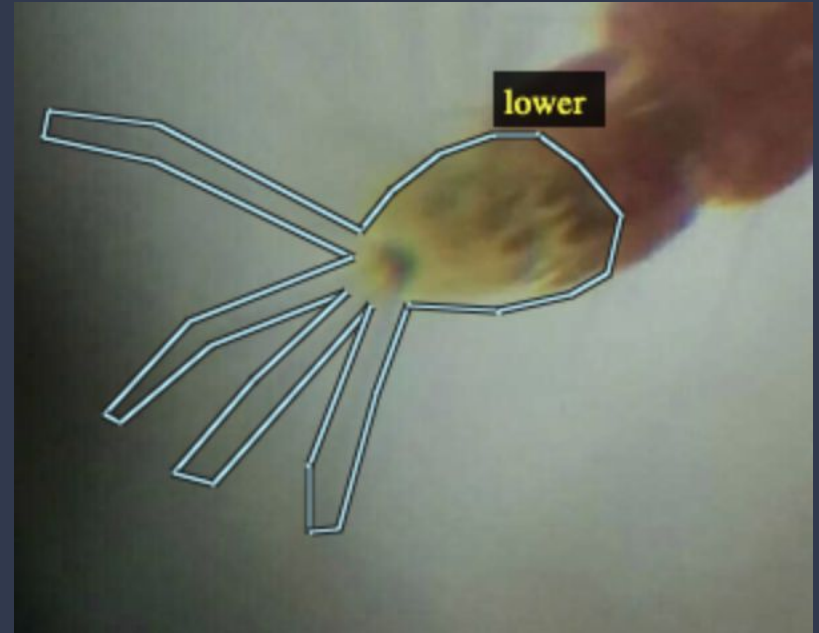

- Aedes
- Anopheles
- Culex

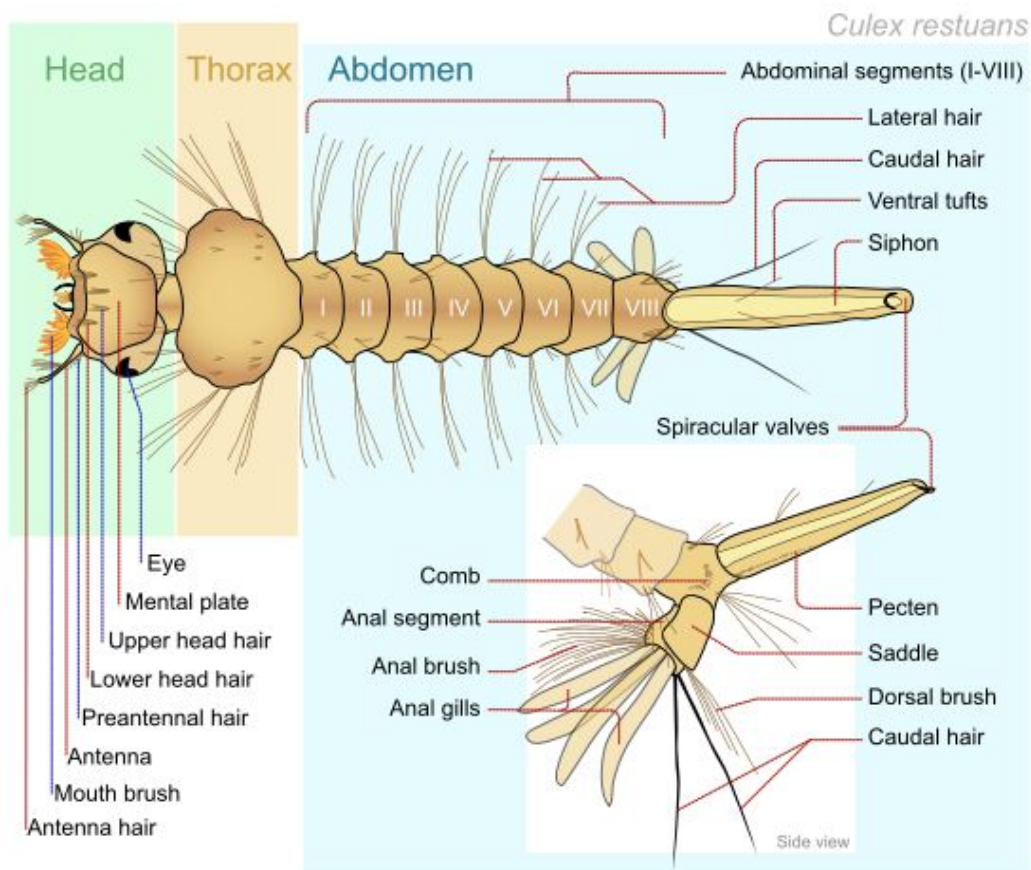

Identify Body Parts

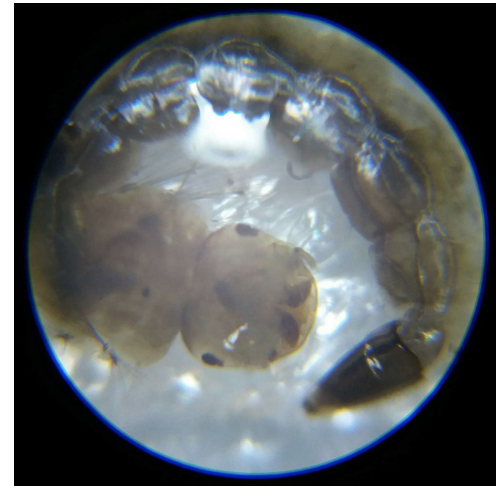

Terminal Parts

Anopheles

- There is clearly only one part in the terminal area. It can be saddle or siphon. But looking at the darkness, it can be siphon
- Aedes / Culex ?

Anopheles

- There are two parts in the terminal area - saddle and siphon
- Aedes / Culex ?

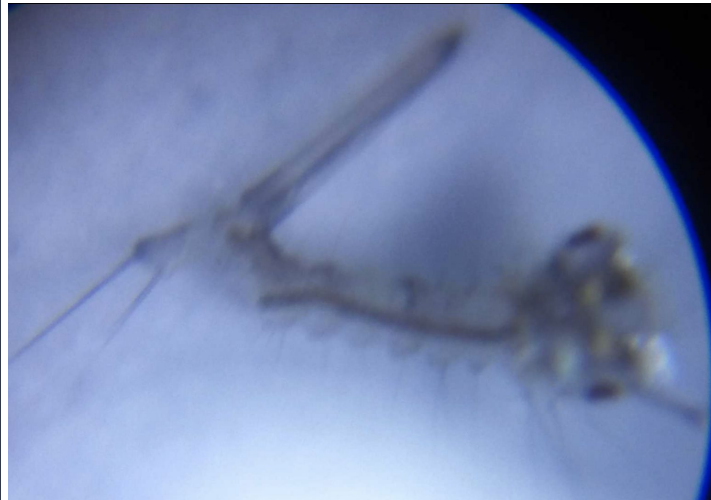

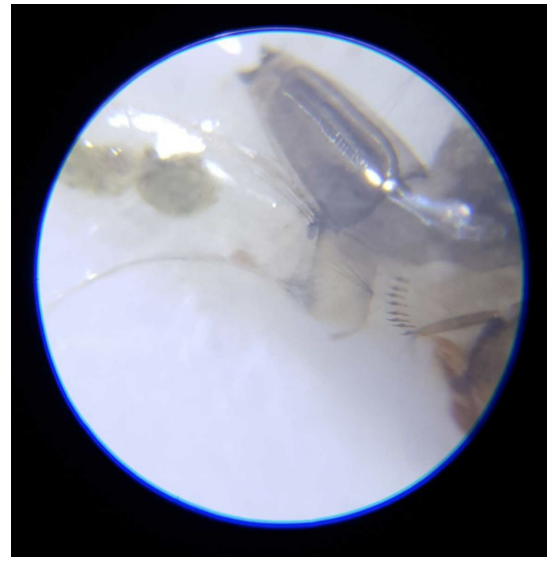

Culex

- Culex has a sharp siphon??
- Head can be bigger than thorax?

Culex

- Is that the saddle part?
- Can't segment the body parts
- Can't separate head and thorax

Thank You
